

WORKING FOR A HEALTHY FUTURE

## Health and Safety Services

IOM can help you maintain a safe and healthy workplace and comply with the complex and extensive health and safety legislation in the UK. We have a wealth of experience providing a wide range of service relating to health, safety and the environment in the public and private sectors. Whether you require risk assessments, training or an all-encompassing integrated service, IOM can help you.

### Our services

Effective health and safety management doesn't happen by accident, it needs sound policies, good systems, careful planning and committed implementation. Ongoing performance monitoring, regular auditing and reviews will help you maintain a safe and healthy workplace.

IOM, from its offices in Edinburgh, Chesterfield, Stafford and London can help you with all of these and provide cost effective, practical solutions to difficult issues.

We can provide a full range of services that will help you comply with the wide range of health and safety legislation (including Management Regulations, DSE, Manual Handling, Workplace and PPE, COSHH).

### RESEARCH CONSULTING SERVICES

Multi-disciplinary specialists in Occupational and Environmental Health and Hygiene

## Case Study

IOM has recently successfully completed a major contract providing the health, safety and environmental management during the demolition of one of Europe's largest semiconductor plants.

The main part of the first stage of our work was an assessment of the residual contamination in tanks, in equipment and in the hundreds of miles of pipes, ducts and drains. We systematically inspected each item and this resulted in the collection of about 500 samples which we analysed for a wide range of inorganic and organic chemicals in our UKAS Accredited laboratories. This work facilitated the safe decontamination and dismantling of plant and the proper disposal of chemical contaminants.

We provided practical help throughout the contract, developing and supervising safe working methods and assisting with and approving a wide range of risk assessments from the many contractors on site. We undertook occupational hygiene monitoring for noise, vibration, dusts and chemicals, assisted with control measures and, where appropriate, provided occupational health advice. Our work did not stop at the workplace. We monitored water and ground conditions throughout the contract and measured perimeter noise and dust levels.

We were part of a strong, proactive project team working for a committed client and very few issues arose during the year-long contract. The few that did crop up were dealt with promptly and effectively.

## Our services are extensive and include

- Assistance with the development and implementation of safety management systems
- Risk assessments
- Audits and reviews
- Training (awareness and professional)
- Preparation of policies and method statements
- On-going support
- Site inspections
- Chairing safety committee
- Health impact assessments
- Environmental audits and monitoring

## Our Commitment to You

IOM has a unique depth and breadth of experience in providing consultancies and services to industry in health and safety at work. Our aim is to provide high quality, practical advice to our clients to help them maintain a safe and healthy working environment and to comply with health and safety legislation.

We routinely assess, audit and advise on matters relating to general health and safety. We provide anything from one-off basic risk assessments to on-going strategic advice to clients over periods of many years. We also provide expert witness services for civil litigation and public inquiries.

## Did you know?

You are only a phone call or a mouse click away from accessing the full range of **IOM Services**. These are underpinned by an unrivalled body of knowledge, and more than three decades of service provision and research. We provide a wide range of health and safety services encompassing many diseases and risk factors. We can help you with both large issues and small, and our services include:

- occupational health support
- clinical examinations
- health surveillance
- COSHH assessments and monitoring
- noise and vibration surveys and assessments
- laboratory analysis
- DSE and Manual handling assessments
- ventilation testing
- protective clothing testing
- Immunology testing and allergen monitoring
- face fit testing for respirators
- legionella testing,
- stress management
- control of exposure and personal protection
- asbestos surveys, monitoring and management

Our purpose is to help you keep workers healthy. Our teams of scientists, clinicians, technicians and consultants include a number with international reputations in their fields of expertise. So, whatever your occupational health concerns, we'll give you access to real experts, who will listen, understand, and focus on providing the services and help that you need.
